

# KHÁNH TRẦN

## Contact

### Phone

+84 374785604

### Email

keieszero2412@gmail.com

### Address

1194 Lang, Hanoi

## Education

### Bachelor of International Economics

Foreign Trade University  
2024 -2028

## Skills

- Programming, visualization tools and database: Python, Pandas, R, Excel Power BI, API integration
- Modelling and AI: Scikit-learn, XG Boost, Pytorch
- Problem-Solving
- Time Management
- Presentation Skills

## Experience

### AI PERFORMANCE EVALUATOR

#### (RemoBPO Project)

- Model Evaluation: Assessed and scored AI model outputs based on accuracy, logical coherence, relevance, and safety to identify edge cases and hallucinations.
- Data Optimization (RLHF): Applied Reinforcement Learning from RLHF methodologies by ranking AI responses and providing structured feedback to guide model fine-tuning.
- Quality Assurance: Conducted A/B testing on model iterations and ensured the high-fidelity of large-scale training datasets for AI performance enhancement.
- Prompt Engineering: Designed and tested complex STEM prompts to evaluate model boundaries and stress-test generative capabilities.

### AI Data Analyst (NAVER AI Hackathon)

- Engineered data pipelines and implemented AI/ML models to solve complex, data-driven case studies under strict time constraints.

### Quantitative Competitor (QC4SG

#### Vietnam 2026 & WorldQuant BRAIN)

- Applied quantitative finance models and time-series data analysis to solve advanced algorithmic challenges at the 2nd SEA Quantathon.
